Metaphysics (metăfi·ziks), *sb. pl.* [pl. of Metaphysic *sb.*, repr. med.L. *metaphysica* (neut. pl.), med.Gr. (τὰ) *μεταφυσικά* (neut. pl.), an alteration of the older τὰ μετὰ τὰ φυσικά, 'the (works) after the Physics' (cf. Meta- and Physics), the title applied, at least from the 1st century A.D., to the 13 books of Aristotle dealing with questions of 'first philosophy' or ontology.

This title doubtless originally referred (as some of the early commentators state) to the position which the books so designated occupied in the received arrangement of Aristotle's writings (τὰ *φυσικά* being used to signify, not the particular treatise so called, but the whole collection of treatises relating to matters of natural science). It was, however, from an early period used as a name for the branch of study treated in these books, and hence came to be misinterpreted as meaning 'the science of things transcending what is physical or natural'. This misinterpretation is found, though rarely, in Greek writers, notwithstanding the fact that μετά does not admit of any such sense as 'beyond' or 'transcending'. In scholastic Latin writers the error was general (being helped, perhaps, by the known equivalence of the prefixes *meta-* and *trans-* in various compounds); and in English its influence is seen in the custom, frequent down to the 17th c., of explaining *metaphysical* by words like 'supernatural', 'transnatural', etc.]

Metembryo (mete·mbri,o). [f. META- + EMBRYO.] The gastrula stage of a metazoon.

1887 HYATT in *Proc. Boston Soc. Nat. Hist.* 397 The proper name for these stages would .. be Metembryo, in allusion to the fact that the ovum at this stage is probably essentially a Metazoon.

Hence **Metembryo·nic** *a.*, 'of or pertaining to a metembryo' (*Cent. Dict.* 1890).

Metempiric (metempi·rik). [f. META- + EMPIRIC.

Introduced, together with the related words, by G. H. Lewes in 1874.]

1. (Also **Metempirics** with sing. construction: cf. *metaphysic*, *metaphysics*.) The philosophy of things that lie outside the sphere of knowledge derived from experience.

The writers quoted differ greatly in their application of the term, but the question between them is what is meant by 'experience'; the definition given above would be accepted on both sides.

1874 LEWES *Probl. Life & Mind* Ser. I. I. 18 Metempirics sweeps out of this region in search of the *otherness* of things. *a* 1881 A. BARRATT *Phys. Metempiric* xi. (1883) 130 Any metempiric which does more than numerically multiply, or vary in degree, existence as we have it in experience, or which postulates beings whose qualities bear no resemblance to those of experience, must be at once rejected.

2. One who believes in or supports metempirical philosophy; a metempiricist.

a 1881 A. BARRATT *Phys. Metempiric* iii. (1883) 19 Every man who believes in the consciousness of his fellows—every man who uses the word 'we'—is a Metempiric. 1882 in OGILVIE, and in later Dicts.

Metempirical (metempi·rikăl), *a.* [f. META- + EMPIRICAL.] Pertaining to matters outside the range of knowledge derived from experience. Also, of opinions and their advocates: Maintaining the validity of concepts and beliefs based otherwise than on experience.

1874 LEWES *Probl. Life & Mind* Ser. I. I. 17 If then the Empirical designates the province we include within the range of Science, the province we exclude may fitly be styled the Metempirical. *a* 1881 A. BARRATT *Phys. Metempiric* ii. (1883) 17 The simplest Metempirical assumption, and one made by every man, is that there *is* a Metempirical existence, that he and his own experience are not all that has ever existed. 1888 *Athenæum* 11 Feb. 184 It appropriated for empiricism doctrines hitherto the special property of metempirical schools.

Hence **Metempi·rically** *adv.*, in a metempirical sense or manner.

1884 *Spectator* 2 Feb. 161 Every atom .. is .. 'metempirically', as he [*sc.* Barratt] calls it—a centre of consciousness.

Meter (mī·tə1), *sb.*³ Also 9 (*rarely*) **metre.** [First used in *gas-meter*; probably an application of METER¹, suggested by the earlier GASOMETER or by the other words with the ending -METER.]

1. a. (In full *gas-meter.*) An apparatus for automatically measuring and recording the volume of gas supplied for lighting or other purposes.

In the ordinary forms, the gas is made to pass through receptacles of known capacity, each filling and discharge of one of these being registered by the movement of an index on a dial. *Dry meter*: a meter in which no water is used; the earlier and still commonly used form being called for distinction *wet meter.*

b. In extended sense: Any apparatus for automatically measuring and recording the quantity of a fluid or the like flowing through it. Used with prefixed word, as *water-meter, electric light meter*, etc., exc. where the purpose is sufficiently indicated by the context.

Also, with prefixed attributive word, in the names of instruments for measuring electrical quantities of various kinds, as *ampere-meter, coulomb-meter, farad-meter, ohm-meter, voltmeter, watt-meter*, which see under their respective first elements. See the remarks on these under -METER.

Meter: see METRE ¹ and ².

-meter, in actual use commonly *-o·meter*, and in some later formations *-i·meter*, a terminal element in words denoting scientific instruments for automatically measuring something. Many words with this ending, as *barometer, hydrometer, hygrometer, thermometer*, were formed in the 17th c., and represent mod.L. forms in *-metrum* (F. *-mètre*, It. *-metro*). In these early examples the ending is always appended to Gr. noun-stems, or combining forms in *-o*, and the mod.L. form shows that it was intended to represent the Gr. *μέτρον* measure (see METRE ¹); the formation is irregular, as the Gr. word does not occur in combination with sbs., and would not correctly express the required notion of 'instrument that measures'. In the 18th and 19th c. many additional words were formed with this ending on Greek bases, as *actinometer, anemometer, chronometer, eudiometer*, etc. Near the end of the 18th c. hybrid formations began to be introduced (many of them first occurring in Fr.). In some of these the form of Greek compounds is imitated, as in *gasometer, galvanometer, alcoholometer, lactometer, pedometer*; in others the combining-vowel *i* of the Latin first element is retained, as in *calorimeter, gravimeter, densimeter, velocimeter.* In some late formations *-meter* is appended to modern words without any attempt to assimilate the form of the first element to that of a Gr. or Latin combining form, as in *voltameter, ammeter.* Cf. also the names of electrical measuring instruments mentioned under MEGA- *sb.*³ 1 b, which might perhaps be more correctly viewed as examples of the suffixed *-meter* than as examples of the sb. with defining word.

Jocular nonce-words in *-meter* have been frequently formed, chiefly in imitation of Sydney Smith's FOGOMETER, with the sense 'a means of measuring or ascertaining the opinion or prevalent

character of some class of people'; also occasionally in names of imaginary instruments for measuring the amount or degree of something, as in *obscenometer*. Similar hybrid formations have sometimes been adopted as trade names for certain instruments, e.g. *comptometer* [F. *compte* account], a kind of calculating machine, *distance-ometer*.

Methinks (mĭpi·nks), *impers. v.* Now *arch.* and *poet.* Pa. t. **methought** (mĭpǫ̈·t). Forms: see below and cf. THINK *v.*[1] [OE. *mé þynċþ* (pa. t. *mé þúhte*), where *mé* is dative, and *þynċþ* the 3 pers. sing. of *þyncean* to seem: see THINK *v.*[1]

As THINK *v.*[1] did not, exc. in this phrase, survive beyond the 14th c., and had no very wide currency after 1250, the syntax of *methinks* became obscure. Hence it underwent various alterations of form. The verb being supposed to be THINK *v.*[2], it followed that it ought to be in the first person; hence the form *me think*, in which probably the pronoun was still correctly apprehended as a dative. In the 16–17th c. there occur the forms *my think, my thoughtis*, which are attempts to obtain a normal syntax by taking *think, thought*, as 1st. The curious form *methoughts*, used in the 17th and the first half of the 18th c., prob. owes its *s* to the analogy of the present tense *methinks*.]

It seems to me. (Used with dependent clause or parenthetically.)

Methodist (me·*th*ɒdist). [ad. mod.L. *methodista*: see METHOD *sb.* and -IST. Cf. F. *méthodiste.*]

1. *Hist.* A physician of the 'methodic' school. (See METHODIC *a.* 1.) In the 17th c. sometimes applied to the regular or orthodox medical practitioners of the day, in contradistinction to those who favoured the use of new remedies.

According to Celsus, the members of this school (called in Latin *methodici*, in Gr. *μεθοδικοί*) differed from the Dogmatic school in basing their treatment not on principles deduced from a classification of diseases according to their origin, but on the theory that morbid conditions consisted either in 'looseness', 'tightness', or a mixture between the two (*fluens, strictum, mixtum*), each of the three states having its appropriate set of remedies. The founder of the school was Themison, about A.D. 100.

4. a. Originally, a term applied to the members of a religious society (nicknamed 'the Holy Club'), established at Oxford in 1729 by John and Charles Wesley and other members of the University, having for its object the promotion of piety and morality; subsequently applied to those who took part in or sympathized with the evangelistic movement led by the Wesleys and George Whitefield. **b.** In later use, a member or adherent of any one of a number of religious bodies or denominations which originated directly or indirectly from the labours of the Wesleys and Whitefield.

In England, the designation belongs especially to the members and adherents of the Wesleyan-Methodist Society founded by John Wesley, and of the various other bodies that have proceeded from it or from each other by succession, as the New Connexion Methodists, the Primitive Methodists, the United Methodist Free Church, and others. All these bodies accept in the main the Arminian theology of Wesley, and in nearly all of them the ministers (called 'travelling preachers') change their place of abode after a certain period (usually three years). In the U. S. the most influential body of Methodists is the Methodist Episcopal Church, which was directly founded by John Wesley (who ordained its first bishop, Dr. Coke), and which is recognized by the English Wesleyan-Methodist Society as in full communion with it. There are also several other bodies in the U. S. that adopt the name as a part of their official designation. In Wales the name 'Methodists' commonly denotes the body more fully known as 'Calvinistic Methodists', which was founded by Welshmen influenced by the teaching of Whitefield; it is now federated with the United Free Church of Scotland and the Presbyterian Church of England.

The origin of the name, as applied to the associates of the Wesleys at Oxford, is somewhat obscure. Cf., however, sense 3 a, and the 17th c. use in examples like quots. 1647, 1658, in sense 2.

2. (= MEZZOTINTO 2.) A method of engraving copper or steel plates for printing, in which the surface of the plate is first roughened uniformly, the 'nap' thus produced being afterwards completely or partially scraped away in order to produce the lights and half-lights of the picture, while the untouched parts of the plate give the deepest shadows. Also, a print produced by this process.

The invention has often been ascribed to Prince Rupert, who certainly practised the method, and made it known in England; but it is now established that he learned it from a Hessian colonel, Ludwig von Siegen, of whom an example is extant dated 1642.

†**Miching mallecho.** Occurs only in the Shaks. passage quoted, and echoes of it; of uncertain form, origin, and meaning.

It is probable, though hardly certain, that the first word is MICHING *ppl. a.* The conjecture that the second word represents Sp. *malhecho* misdeed (whence Malone and subsequent editors print *malfecho*) yields a fairly satisfactory sense; but there is no evidence that the Sp. word was familiar in English, and its pronunciation (malʲeʧo) does not account for the forms in the early editions.

1601 SHAKS. *Ham.* III. ii. 146 Marry this is Miching Mallicho [*sic* Fol. 1 (1623): Q 1 (1603) myching Mallico; Q 2 (1604) munching Mallico], that meanes Mischeefe. 1836 E. HOWARD *R. Rector* xliii, There was no 'minching mallicho', or anything like mischief. 1881 STEVENSON in *Longm. Mag.* I. 71 Other spots again seem to abide their destiny, suggestive and impenetrable, 'miching mallecho'.

Micht, obs. Sc. form of MIGHT.

Mick (mik). Shortened form of proper name *Michael*, applied jocularly to an Irishman.

1882 'MARK TWAIN' *Innoc. at Home* II, When the Micks got to throwing stones through the Methodis' Sunday-school windows. 1893 A. FULLER *Lit. Courtship* x. 93 If once she gets hold of that fact, you will wish you had been born a 'mick'.

[Com. Teut.: OE. *micel* (also *mycel*) = OS. *mikil* (MLG. *michel*), OHG. *mihhil* (MHG. *michel*), ON. *mikell*, also *mykell* (nom. and acc. neut. *miket, myket*, acc. masc. *mikenn, mykenn*; Sw. *mycken*, neut. *mycket*; Norw. dial. *myken*, neut. *myket*; Da. *meget* neut.), Goth. *mikils*:—OTeut. **mikilo-*, corresponding to Gr. *μεγαλο-*, lengthened stem of *μέγας* great; the shorter form of the adj. is represented in Teut. only by ON. *miǫk* adv., very, which formally corresponds to Gr. *μέγα* neut. The root **meg-* (represented also in Armenian *mets* great, and perh. in L. *magnus*) appears to be allied to the Aryan root **magh-* of Skr. *mah, maha, mahan* great.

The OE. form *mycel* (which is not a mere graphic variant of *micel*, but stands for an actual pronunciation) is difficult to explain; it is commonly supposed to be due to association with *ỹtel* LITTLE *a.* The similar change of *i* into *y* in ON. *mykell, mykl-*, is believed to proceed from the influence of the *u* in the inflected forms *miklu, miklum*; but this explanation is not applicable to OE.

The phonology of the ME. and modern forms is in many points obscure. Normally, OE. *y* would become in the S.W. *u*, pronounced (ū), and elsewhere *i*; the abnormal *u* (in ME. also written *o*) of the β and ε forms has not yet been satisfactorily explained. The forms with *k* are northern and north-midland; the regular southern forms with *ch* are obsolete, having given place to the shortened *much*, MUCH.

In present dialectal use the prevailing form is *muckle*; but *mickle* and *meikle* are often used by modern Scottish writers even when their own colloquial dialect has only *muckle*. The archaistic use in non-dialectal poetry is rare, and almost confined to the form *mickle.*]

1. In partitive concord, expressing adjectivally the sense: (The) middle or midst of. (In mod. Eng. usually hyphened.)

Originally *mid* in this sense could be used without restriction, but in mod.Eng. its application has been greatly narrowed. It is still extensively used in scientific and technical language; and it is common (though rather literary than colloquial) in advb. phrases formed with *in* prep., the article being most frequently omitted, as *in mid-career*, *in mid-volley* (see d); but the use of phrases of this type not traditionally current is apt to seem affected. The attributive use of the combinations of *mid-* is also frequent.

On the former view the primary sense would be 'a woman by whose means the delivery is effected'; on the latter view, 'a woman who is *with* the mother at the birth'. The latter seems the more likely, though analogies are wanting for this mode of formation. The Sp. *comadre*, which is sometimes quoted, is not to the point, as the sense 'midwife' is merely developed from that of 'gossip', originally 'fellow-(god)mother'. The mod.G. *beifrau*, midwife's assistant, has also been compared.

The early (but not earliest) form *medewife* seems to be due to etymologizing association with MEED *sb.*, as *mede-* does not otherwise occur as a ME. variant of *mid-*. The colloquial pronunciation (mi·dif) is now seldom heard.]

Mile (məil), *sb.*[1] Forms: 1 mil, 3–7 myle, 4–6 myl, 5 *Sc.* myill, 5–6 mylle, 7 mille. [OE. *mil* fem. = MDu. *mile* (Du. *mijl*), OHG. *mîla, mîlla* (MHG. *mîle*, mod.G. *meile*), ON. *mîla* (prob. from OE.; Sw., Da. *mil*):—WGer. **mîlja*, a. 1. Originally, the Roman lineal measure of 1,000 paces (*mille passus* or *passuum*), computed to have been about 1,618 yards. Hence, the unit of measure derived from this, used in the British Isles and in other English-speaking countries. Its length has varied considerably at different periods and in different localities, chiefly owing to the influence of the agricultural system of measures with which the mile has been brought into relation (see FURLONG). The legal mile in the British Empire and the U.S. is now 1,760 yards. The Irish mile of 2,240 yards is still in rustic use. The obsolete Scottish mile was longer than the English, and probably varied according to time and place; one of the values given for it is 1,976 yards.

The use of the sing. form with a plural numeral is now only vulgar or dialectal; in the earlier part of the 19th c. it was recognized as permissible colloquially.

2. Used to render its etymological equivalent in other European languages.

In Italy (where there are many different miles), Spain, and Portugal, the 'mile' has been developed from the ancient Roman measure, and its length ranges between ¾ and 1¼ English mile. In Germany, Austria, Holland, and the Scandinavian countries, on the other hand, the 'mile' seems to represent the ancient Germanic *rasta*, to which the Latin name was apparently applied arbitrarily; its values range from about 3¾ to over 6 English miles.

3. *Geographical, geometrical,* †*maritime, nautic(al mile*: a measure of length = one minute of a great circle of the earth.

Owing to the fact that the earth is not a true sphere, the 'mile' as thus defined varies considerably, the difference between the extreme values being about 62 feet; when taken as a minute of the meridian, the value increases with the latitude, in consequence of the varying curvature. It has therefore been found convenient to assign a standard value for nautical use; the British Admiralty fixes it at 6,080 feet.

The militia consists of bodies raised by the several counties in numbers varying according to the population and other circumstances, the number or 'quota' to be provided by each shire being fixed by the government. Since 1803, the law has been that the quota may, if necessary, be raised by compulsory enlistment, a ballot being taken among the men between 18 and 35; but as sufficient numbers are at present obtainable by voluntary enlistment, a 'Militia Ballot Suspension Act' is passed annually. The militia are bound to assemble for 28 days in every year for training, and may at any time be embodied for compulsory service within the kingdom, but cannot be sent abroad except as volunteers, and then only by consent of Parliament.

c. A mechanical apparatus, whether simple or complicated, for grinding corn.

Not found until the 16th century; the quots. 1535 hardly prove its currency, as Luther, whom Coverdale very often follows, has *mühle* in both passages. The older word for a handmill was Quern; in the case of a water-mill or windmill, there was little occasion to separate the notion of the machinery from that of the containing fabric which was necessarily connected with it.

1535 Coverdale *Exod.* xi. 5 The mayde seruaunte which is behynde yᵉ myll. — *Matt.* xxiv. 41 Two shal be grynding at the Myll. 1563–87, 1573–80 (see Hand-mill). 1624 Markham *Cheap Husb.* (1668) I. v. 40 If you cause these Beans to be spelted upon a Miln, and so mixt with Oats, it will recover him. 1674 Boyle *Grounds Mech. 3. In the 15–16th c., applied by extension to any machine worked by wind or water power in the manner of a corn-mill, though not used for the purpose of grinding. In later use applied to various machines for performing certain operations upon material in the process of manufacture; often with defining word, as in *flatting-*, *fulling-*, *rolling-*, *saw-mill*.

1. One whose trade is the grinding of corn in a mill; the proprietor or tenant of a corn-mill. Also (*? dial.*) applied to that workman in a mill who has charge of the actual grinding.

The OE. word was *mylnweard* (lit. 'mill-keeper': see Millward), denoting the custodian or manager of the mill belonging to the lord. The word *miller* would have the same application so long as 'the lord's mill' continued to be one of the customary appurtenances of a manor.

¶ b. In proverbs imputing to millers dishonesty in the taking of toll.

The proverb given by Ray seems to mean that there are no honest millers, and to allude to the use of the thumb in taking toll of flour. It is probable that this is the original form, and that Chaucer and Gascoigne played upon the phrase, taking the 'thumb of gold' to mean one that brings profit to the owner.

c 1386 Chaucer *Prol.* 563 Wel koude he [*sc.* the miller] stelen corn and tollen thries And yet he hadde a thombe of gold pardee. 1576 Gascoigne *Steele Gl.* (Arb.) 79 When smithes shoe horses, as they would be shod, When millers toll not with a golden thumbe. 1678 Ray *Prov.* (ed. 2) 176 An honest miller hath a golden thumb. 1876 Mrs. Ewing *Jan of Windmill* xxxii, Was 'ee ever in a mill? The sense 'spawn of fish' may have been adopted from Du.; as the milt of a fish is of soft substance like the spleen, the transferred use was not unnatural, but it was no doubt helped to gain currency by the resemblance in sound between *milt* and *milk* (Du. *milch*: see Milk *sb.*), the older name for the soft roe of fish. The sense also exists in Norwegian, where it is to be noted that *mjelte* milt is homophonous with *mjelte* a milking, connected with ON. *mialta* to milk.

The spelling *multi* in the Epinal Glossary cannot be explained with certainty, but it certainly cannot represent an ablaut-variant, of which there is no trace in any Teut. lang.]

¶ In mod. colloquial use the *to* of an inf. suppressed by ellipsis is often retained. (See To *prep.*)

The quots. below enclosed in square brackets are probably to be explained as instances of the idiom by which a prep. governing a relative expressed or understood is removed to the end of the sentence (cf. quots. 1674, 1711, 1726 in d). But the indefiniteness of the antecedent and the presence of a transitive verb in the sentence render the passages liable to be taken as anticipations of the modern colloquial practice, which may indeed have been partly developed from expressions of this kind.

Mine (main), *sb.* Forms: 4–7 **myn**(e, 6 **myene**, **miene**, **mynne**, *Sc.* **mynd**(e, 4– **mine**. [a. F. *mine* (1314 in Hatz.-Darm.), whence Pr., Sp., It. *mina*; also G., Da. *mine*, Du. *mijn*, Sw. *mina*.

The origin of the Fr. word is doubtful. The evidence seems to point to the derivation of the sb. from the vb. (see MINE *v.*), which in the earliest instances had the general sense to excavate, make underground passages, undermine. (The alleged 9th c example of med.L. *mina plumbi* 'lead-mine' given by Du Cange is from a spurious charter.) This renders it difficult to accept the otherwise plausible connexion of the sb. with the OCeltic '*meini-* ore, metal (Welsh *mwyn*, Irish *méiun*).]

1. Qualifying a following sb. Now only *arch.* or *poet.* before a vowel or *h*; otherwise superseded by My, q.v. for the various uses.

4. Ecclesiastical and religious uses.

a. In Pre-Reformation English, applied to a person in orders officially charged with some function in the celebration of worship in a particular church, chapel, chantry, etc. In the rubrics of the Book of Common Prayer the word denotes the clergyman, or any of a number of clergymen, engaged in conducting worship on a particular occasion.

b. In phrases such as *minister of the church, of the gospel*, and the scriptural phrases *minister of God, of Jesus Christ, of the sanctuary*, applied as general designations for a person officially charged with spiritual functions in the Christian Church. Hence from the 16th c. onwards (after the example of foreign Protestant, esp. Calvinistic, use) employed *absol.* in the same sense, at first chiefly by those who objected to the terms *priest* and *clergyman* as implying erroneous views of the nature of the sacred office. The use of *minister* as the designation of an Anglican clergyman (formerly extensively current, sometimes with more specific application to a beneficed clergyman) has latterly become rare, and is now chiefly associated with Low Church views; but it is still the ordinary appellation of one appointed to spiritual office in any non-episcopal communion, esp. of one having a pastoral charge. The term *minister of religion*, as applied to a 'clergyman' or 'minister' of any religious denomination, is common in official use.

1. A kind of fur used as a lining and trimming in ceremonial costume.

French lexicographers say that *menu vair* is the fur of the *petit-gris*, a variety of the common squirrel. What the Eng. *miniver* meant in early use is uncertain; some have supposed that it was the white fur of the Siberian squirrel; the application may have varied at different times, but etymology would suggest that it must have been an artificially spotted or variegated fur, with a smaller pattern than that of *vair*. In 1688 R. Holme explains *miniver* as 'plain white fur', and this (notwithstanding Cotgrave's divergent explanation) may have been the meaning of the word as used with reference to the costume of judges and the lower nobility in the 16–17th c. In this sense the term was revived in the official regulations for the coronation of Edward VII, and it has since had some currency in the description of the ceremonial costume of peers.

Pured miniver, miniver pure = AF. *meniver purè*, 'powdered miniver'; but in modern times the adj. has been misinterpreted as 'pure white'.

¶ Recent Dicts. attribute to the word the sense that belongs to *menu vair* in Fr. heraldry, viz. a fur distinguished from *vair* in that the shield *menu vair* has six rows of spots instead of four. But this use has never been recognized in English heraldry.

2. In early use (i. e. down to the end of the 16th c.), a general designation for any one whose profession was to entertain his patrons with singing, music, and story-telling, or with buffoonery or juggling. In modern romantic and historical use commonly with narrowed and elevated application: A mediæval singer or musician, esp. one who sang or recited, to the accompaniment of his own playing on a stringed instrument, heroic or lyric poetry composed by himself or others.

The use of the word in romantic poetry and fiction has so coloured its meaning that the application to a mere jester, mountebank, or conjuror, originally common, would now seem inappropriate.

The quasi-prepositional use (sense 1), from which all the other Eng. uses have been developed, did not exist in Latin of any period. It probably originated in the commercial language of the Middle Ages. In Germany, and perhaps in other countries, the Latin words *plus* and *minus* were used by merchants to mark an excess or deficiency in weight or measure, the amount of which was appended in figures. The earliest known examples of the modern sense of *minus* are German, of about the same date as our oldest quotation. In Widmann's book on commercial arithmetic (1489) the signs (—) and (+) occur for the first time in print, and are directed to be read as *minus* and *mer*. In the *Bamberger Rechenbuch* (1483) the tare to be deducted from the weight of a package is called *das Minus*. In a somewhat different sense, *plus* and *minus* had been employed in 1202 by Leonardo of Pisa for the excess and deficiency in the results of the two suppositions in the Rule of Double Position; and an Italian writer of the 14th c. used *meno* to indicate the subtraction of a number to which it was prefixed. For the passages referred to, see Cantor, *Vorlesungen über Geschichte der Mathematik* II. (ed. 2, 1899).

The origin of the symbol (—), read as *minus*, is disputed; some have conjectured that it arose as a merchants' mark, while others believe it to descend from the *obelus* (see OBELISK 2) used by ancient critics to indicate that a passage should be removed from the text. It has certainly no historical connexion with the mark ℔ (explained as the letter ℓ inverted) used by Diophantus for the same purpose. In Denmark the sign (÷) is used for *minus*.]

1. quasi-*prep.* Placed between two expressions of number or quantity to indicate that the second of them must be subtracted from the first. 2. Used as the oral equivalent of the symbol (—) in its algebraical interpretation, as forming with the expression to which it is prefixed the representation of a negative quantity, e. g. in '— 3', '— *x*', which are read as *minus* 3, *minus x*.

Minute (mi·nit), *sb.*¹ Forms: 4 mynut, 4-6 mynute, 4-7 minut, 5 mynwt, mynnate, 6 mynite, -ewte, -iute, *Sc.* minuth, munet, -it, 6-8 mynuit, 7 min-, mynutte, minit, minnite, 4- minute. [In senses 1-3 and 6 a. F. *minute* fem. (whence G. *minute*, Du. *minuut*), ad. L. *minūta*, subst. use of the fem. of *minūtus* MINUTE *a.* In senses 4 and 5 ad. L. *minūtum* (the neuter of the same adj.) used subst. in various applications in late Latin. Sp., Pg. and It. have *minuto* masc. (ad. L. *minutum*) in senses 1-3, but *minuta* (after Fr.) in sense 6.

Senses 1-2 (whence sense 3 is derived) represent the med.L. *minuta*, more fully *pars minuta prima*, denoting the $\frac{1}{60}$ of a unit in the system of sexagesimal fractions (med.L. *minutiæ physicæ*), which, originally derived from Babylon, was used, like the modern decimals in scientific calculations as more easy to handle than 'vulgar fractions' (*minutiæ* simply). The lower denominations of the system were (*partes minutæ*) *secundæ* (our 'seconds'), *tertiæ*, *quartæ*, etc., the understood denominators being the successive powers of 60. The system (ὁ τῆς ἑξηκοστάδος τρόπος) was recognized by Ptolemy (*c* 150 A. D.), who applied it to the degree (μοῖρα) of the circle, to the sixty sections into which he divided the radius, and to the day; the application of the system to the division of the hour is much later, perhaps not earlier than the 13th c. Ptolemy has no terms corresponding to the med.L. *minutæ*, *secundæ*, etc., but merely uses μέρος 'part' or ἑξηκοστόν 'sixtieth'. The word *minuta* is referred to as a term of the 'mathematici' (app. meaning 'minute' of the circle) by St. Augustine *De diversis Quæstt. octoginta tribus* xlv, who also mentions *minutæ minutarum*, 'minutes of minutes' (see 2), *i. e.* seconds.

Sense 6 is from F. *minute*, though Littré has no example before 16th c., and the one quot. for med.L. *minuta* in this use is of date *c* 1500. The primary notion seems to be that of a rough copy in *small* writing (L. *scriptura minuta*) as distinguished from the 'engrossed' document.]

I. A sixtieth (or other definite part) of a unit.

1. The sixtieth part of an hour (divided into sixty seconds). In earlier use frequently † *minute of an hour*; † *minute while.* Also, one of the lines upon a dial which mark the minute spaces.

The *minutum* of early mediæval writers, which was one-tenth of an hour, has no historical connexion with this. For the system of time-reckoning to which it belongs, see ATOM 7.

If the word is the formal equivalent of Sw. *myra* (OSw. also *myr*), Da. *myre*, the OTeut. type may have been either **meuzjōn-* (= Welsh *mywion*, ants) or **miurjōn*, related by ablaut to ON. *maurr* (Norw. *maur*, OSw. *mōr*) whence the synonymous northern ME. MAUR. Another hypothesis is that the Eng. and LG. forms represent an OTeut. **mirzwō*, unconnected with the Scandinavian words and not otherwise found exc. perh. in the doubtful Crim-Goth. *milera*; some scholars would refer this to the root **mig-* (see MIG), so that the etymological notion would be the same as that in the synonymous LG. *mig-ante* (Woeste), *mig-amehen* (Schambach); if so the compound PISMIRE expresses the idea twice over. Outside Teut. several langs. have names for the ant of similar sound to the Teut. words here mentioned, though the difficulties in the way of admitting etymological connexion have not yet been removed: cf. Mis, obs. form of MISS *sb.*[1] and *v.*[1]

Mis, M^is, obs. abbreviations of *mistris,* MISTRESS.

Mis- (mis), *prefix*[1] (also 1 (*rare*), 2–7 **misse-,** 3–6 **misse-, mysse-,** 3–7 **mys-,** 4–5 **mes-**), represents OE. *mis-* = OFris., OS. *mis-* (MDu. *mis(se)-, mes(se)-,* Du. *mis-*), OHG. *missa-, missi-, misse-, mes-* (MHG. *mis(se)-,* G. *miss-*), ON. *mis-,* Goth. *missa-* (in *missadēþs* MISDEED, *missaleiks* different, various, see MISLICH, and *missaqiss* 'speaking diversely', disagreement, tr. Gr. σχίσμα):—OTeut. **misso-* (whence **missjan* MISS *v.*), repr. a pre-Teut. formation with ppl. suffix *-to* on a root ending with a dental. The adj. **misso-* seems to have had two senses: (1) divergent, astray, (2) mutual, alternate (cf. Goth. *missō* mutually). The first of these supports the identification of the root with the Teut. **miþ-* to avoid, conceal (see MITHE *v.*); the two senses may be accounted for by the supposition that the primitive notion expressed by the root was that of difference or change. Phonologically, the Teut. root might represent a pre-Teut. form either with *t* or *th.* On the former view, some scholars regard it as cogn. w. L. *mittĕre* to send, let go; but the sense seems too remote. On the other assumption, it would be cognate with Skr. *mith* 'to meet as friend or antagonist, alternate, engage in altercation' (M. Williams), *mithu* 'alternately, falsely, wrongly', *mithas* 'mutually, reciprocally, alternately', *mithya* 'invertedly, contrarily, incorrectly, wrongly'; cf. OSl. *mitĭ, mitusĭ* alternately. The root **meith-* in these words is by some regarded as an extension of **mei-* to change: see MEAN *a.*[1]

In OE. and ME. MSS. the compounds of *mis-* (as of other prefixes) are written sometimes as two words, sometimes continuously, the hyphen being never used. From the 16th c. onwards the compounds are regularly printed as one word, with or without the hyphen, which becomes, however, less and less frequent, and is now employed chiefly in new or rarely-used formations, and in words like *mis-say* or *mis-cite,* where its omission would tend to disguise the identity of the compound or suggest a wrong pronunciation. (In Sir T. More's Works 1557, the spelling of the compounds as two distinct words was retained, e. g. *misse remember, mysse rule.*) The spellings *mispel, mispend,* etc. for *mis-spell, mis-spend,* etc. were once common and are found as late as the end of the 18th century.

The predominant meaning of the prefix in English, as in the other Teutonic languages, is that of 'amiss', 'wrong(ly)', 'bad(ly)', 'improper(ly)', 'perverse(ly)', 'mistaken(ly)', and this is the only one now recognized in the formation of new compounds. But even in OE. there are instances of its use as a mere negative prefix and also as a pejorative intensive with words of sinister meaning (see 7 and 8 below).

In early ME. a great extension of the use of the prefix took place, *mis-* being freely combined with words of indigenous and of foreign origin alike. Many of the new compounds appear to have been suggested by French formations with *mes-* (see MIS-[2]); thus we have *misbelieve* after OF. *mescreire* (mod. *mécroire*), *misfortune* and *mishap* after OF. *mescheance* (see MISCHANCE); a word like *misjudge* has prob. a double origin, being partly of native formation, and partly an adaptation of OF. *mesjuger.* The most prolific period for the formation of *mis-* compounds was the 17th c., to which a considerable number of those illustrated in this article belong; Bacon, Donne, and Bp. Hall are noteworthy as employing them largely. They still continue to be formed with considerable freedom, but in certain cases *ill-* and *mal-* are now preferred where writers of earlier periods would have preferred *mis-.*

In the ME. period *mis-* became to some extent a separable prefix; thus we have *inumen mis* and *misnumen, don mis* and *misdon, seyn mis* and *misseyn,* side by side. (See further under MIS *a.* and *adv.*) Even as late as the 16th c., the prefix was sometimes co-ordinated with an adj. or adv., as in the example *very erroniouse and misopinions* (see MISOPINION). A related phenomenon, of which an instance is found as late as the 17th c., consists in the dropping of the prefix before the second of two compounds coupled together, e. g. *ich abbe misseien mid egen, mid mine eren iherd* (Lamb. Hom. p. 189), *mysluyng and techynge* (Wyclif), *mis gyed and led, yee mis happe and cheeue* (Hoccleve), *for thou hast mis-said or done* (J. Davies *Ecl.* 1614).

In OE. *mis-* was prefixed to verbs, active and passive participles, nouns of action and condition, and adjectives. In ME. its composition with agent-nouns and adverbs followed as a matter of course, and the principle of prefixing it to any word of the above classes, existing either actually or potentially, became soon established. Hence, in a group of formally related words such as *misrepresent* vb., *misrepresentation, misrepresentative* adj. and sb., *misrepresentatively* adv., *misrepresenter, misrepresenting* vbl. sb. and ppl. a., it is possible (unless there is historical evidence to the contrary) that each member may have been formed independently of any of the others.

All those compounds of *mis-* with respect to which there is evidence of a continuous history during any period, or which belong to a group, are treated in their alphabetical places. Those illustrated in the present article are for the most part nonce-words of obvious meaning.

1. Prefixed to verbs, with the meaning 'amiss', 'badly', 'wrongly', 'perversely', 'mistakenly'.

In OE. about 40 of such compounds are recorded, of which less than half are represented in ME. or mod.E. (see MISBEDE, MISDO, MISFARE, MISFERE, MISLEAD, MISLIKE, etc.)

As now apprehended, the prefix normally implies not censure of the act itself, but only of its manner. With this restriction, nonce-words may be formed very freely. In the 17th c. the use was much wider, and many of the formations of that period would now be inadmissible.

b. In the 14–16th c. a few verbs like Misdeem, Misthink, in which the prefix had originally its normal function, developed new senses in which it had the force of 'unfavourably'. Then also arose a few new formations, such as Misbode, Misdoubt, Misdread, in which *mis-* was prefixed to a verb expressing suspicion or fear, in order to render more fully the notion of uneasy feeling contained in the vb. These new senses and combinations, however, now survive only as *arch.* or *dial.*

9. The existence of pairs of words like *misbelieve* and *disbelieve*, *mislike* and *dislike* gave rise to confusion between the prefixes and to the (often unmeaning) substitution of *mis-* for *dis-* (and even *des-*), as in †*misguise*, †*mismay*. To the same confusion are due the dial. *misdain*, *misdainful* (after *disdain*), *miscry* for *descry*, and *mislest*, corruption of *molest*; also the obs. *mislaundre* for *dislaundre* Dislander.

Mis- (mis), *prefix*[2] (Forms: 3–5 mes-, 4 mess(e)-, 4–5 mys(e)-, 3– mis-) in compounds adopted from French represents OF. *mes-* (mod.F. *més-*, *mes-*, *mé-*) = Pr. *mes-*, *mens-*, Sp., Pg. *menos-*, OIt. *menes-*, *minis-*, It. *mis-* (also med.L. *mis-*):—Com. Rom. *minus-*, a use of L. *minus* adv. 'less, not', as a prefix with the signification 'bad(ly)', 'wrong(ly)', 'amiss', and with negative force, in comb. with verbs, adjectives, and nouns.

The list of words derived immediately from OFr. compounds of *mes-* is not large, the most important being Misadventure, Mischance, Mischief, Miscontent, Miscreant, Misease, Misnomer, Misprize; but the number due directly or indirectly to the influence of such compounds is prob. much larger (cf. Mis-[1]). In English the prefix became ultimately identical in form (as it was in meaning) with Mis-[1].

Mischief, *mischievous*, and *miscreant* are the only compounds of Mis-[2] having the stress on the prefix. This is due to the fact that they early ceased to be felt as compounds, and while they followed the rule of stress-change in French-derived words, *mischance* and the rest fell under the influence of the native compounds of Mis-[1], and so have their stress on the root.

MISBODE—MONOPOLY.

BY

HENRY BRADLEY, HON. M.A., PH.D.

NOTE.

This double section includes 2405 Main words, 268 Special Combinations explained under these, and 808 Subordinate entries; in all 3481. The *obvious combinations* recorded and illustrated number 309, making a total of 3790. Of the Main words 570 (23¾%) are marked † as obsolete, and 98 (4%) are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *Misbode* to *Monopoly*	359	1983	2018	2103	3790
Words illustrated by quotations	275	742	859	203	3022
Number of illustrative quotations	771	933	1778	253	14,394

* Including the Supplement of 1902.

The number of quotations in the corresponding portion of Richardson is 962.

More than a third of the space in the present instalment is occupied by the words beginning with the prefix *mis-*, which are partly of native English and partly of Romanic origin. Of the remaining words, the great majority are of Latin and French etymology. There is, however, a considerable number of native words, but several of these are obsolete; of those which still survive in use the most prominent are *miss* sb.[1] and vb.[1], *mist*, *mite*[1], *moan* sb. and vb., *mole* sb.[1] and sb.[2], *Monday*. Of ultimately Greek derivation are the many formations with the prefixes *mis(o)-* and *mon(o)-*, and a few other words, as *mnemonic* and its cognates, *moly*, *molybdena*, *molybdic*. The only Celtic words are *moar*, *mobarship*, *mod*, and *mollag*, which have a very slender claim to be regarded as English. Modern German has given us *mispickel*; from Dutch there are the obsolete and rare *misken* sb., *miskin*[2], *miskin-fro*. Hebrew is represented by *mishna(h* and *Moloch*; Arabic, Persian, and various Indian tongues by *miskal*, *mochras*, *mofussil*, *mogra*, *Mogul*, *mohair*, *Moharram*, *mokaddam*, *monaul*, *mongoose*; the American Indian languages by *mitu*, *mituporanga*, *mobbie*, *moccasin*, *moco-moco*, *Mohawk*, *Mohican*; Maori and Polynesian by *moa*, *mohiki*, *moho*, *moki*, *moko*, *moko-moko*.

Although this double section contains no article of great length, the words exhibiting remarkable sense-development are perhaps more than usually numerous. Among these may be mentioned *mischief*, *miscreant*, *miser*, *miss* sb.[1] and sb.[2], *miss* vb.[1], *mistress*, *mite* sb.[2], *mock* vb., *mode*, *model*, *moderate*, *moderation*, *modern*, *modest*, *modulate*, *molest*, *moment*, *money*, *mongrel*, *monk*, *monopoly*.

In the department of etymology the most noteworthy point is the derivation of the verb *mix*, which is not, as has hitherto been commonly asserted, the representative of the Old English *miscian*, but a development from the Latin participle *mixtus*. The true explanation was already given in 1893 by Dr. Murray in the article *Commix*, but has been overlooked or tacitly rejected by subsequent lexicographers. Another result of some interest is the ultimate identity of *mockado* and *mohair*. Etymological facts or suggestions not given in previous Dictionaries will also be found in the articles *miss* sb.[1], *mistletoe*, *mitis*[1] and [2], *mizen*, *mo*, *mock* vb., *mode*, *moderate* vb., *moire*, *moist*, *mole* sb.[2], *moline*, *monkey*.
